110 Volt Electric Gear Motor with Variable Speed AC Drive Control System
Control Box with Single Button Activation for rotation
Auto Index Stop feature
3 Year Complete Warranty
Footprint 9'L x 9'W x 11'H

Each Squaring Section Includes:

- a 26" x 62" capacity (minimum 4" x 12")
- Pneumatic Dial Control System with Single Lever Valve Operation
- Dial Regulators on each clamp offer fine adjustment to each miter corner
- (2) Vertical & (2) Horizontal Pneumatic Clamps
- Heavy Duty 20 square inch Diaphragm cylinders on each clamp
- Precise , Accurate clamping for Miter as well as Stile & Rail Doors
- Quick changeovers with newly updated heavy duty roller clamps

Increase production by eliminating the pinning process and clamping doors face up for a much higher quality miter door. Machine rotation is 4 seconds and an operator can clamp & square a door every 5 minutes.

Clamp & Square up to 400+ Miter Cabinet Doors per day without Pinning. Designed for the large custom shop who produce high quality Miter as well as Stile & Rail Kitchen Cabinet Doors.
